## DETAILED ACTION

### *Drawings*

1. The drawings were received on 12/5/06. These drawings are approved.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by W.O. Pat.

Document No. 01/75842 to Netto.

Netto '842 teaches Applicant's claim limitations including : a "head" – including 1, 17, "with an elongated passage" the passage through 1, a "panel" – 18, a "thin body" – 8, a "weakened portion" – 15.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3676

5. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over W.O. Pat. Document No. 01/75842 to Netto in view of France Pat. No. 2,632,431 to Malachowski.

Although one of ordinary skill in the art would recognize that Netto '842 discloses locking means, the reference does not explicitly disclose locking structure comprising a "metal plate" as claimed. However, Malachowski '431 discloses that it is well known in the art of seals to provide a metal plate (200) as claimed. It would have been an obvious design choice or engineering expedient for one of ordinary skill in the art at the time of the invention to provide the seal of Netto '842 with a metal plate as taught by Malachowski '431 in order to securely bite into the plastic material in tamper-resistant locking engagement as intended as well known in the art. One of ordinary skill in the art would have more than a reasonable expectation of success since the proposed modification would not otherwise affect function of the seal. The outer and inner surface of 1, as shown and as modified to accommodate a metal portion as disclosed by Malachowski '431, defines "outer" and "inner tubular body" body.

### ***Response to Arguments***

6. Applicant's arguments have been fully considered but they are not persuasive.

The law of anticipation requires that a distinction be made between the invention described or taught and the invention claimed. It does not require that the reference "teach" what the subject patent teaches. Assuming that a reference is properly "prior art," it is only necessary that the claims under consideration "read on" something

disclosed in the reference, i.e., all limitations of the claim are found in the reference, or "fully met" by it. *Kalman v. Kimberly-Clark Corp.*, 218 USPQ 789. Persuasive arguments should clearly point out claimed elements that are not taught by the prior art. There is however, no requirement for the prior art to use the same terminology for structures corresponding with the claimed elements. Claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974).

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
